Interests: History and philosophy books, soccer, basketball, Muay Thai.

PROJECTS

Plateau - Strength Plateau Diagnosis

<https://plateau-dx.vercel.app>

Sole Product Owner - concept, scope, and shipped release

2026

- Noticed that lifting trackers show your data but never explain it, leaving users to figure out a stalled lift on their own. Built the product around explaining, not just tracking.
- Scoped v1 by translating informal user pain points into a focused set of requirements: spot the stall, explain the likely cause, show the evidence, and cut nutrition tracking, cardio, and social features to keep the product focused.
- Chose simple, checkable rules over a black-box model so users could see why the app reached a verdict, and defined the core tradeoff: how sure it should be before speaking up, since being too quick erodes trust and being too slow makes it just another logbook.
- Directed AI-assisted development of the app's FastAPI-based backend and React frontend, focusing personal effort on problem scoping, decision logic, and threshold tuning.

PROFESSIONAL EXPERIENCE

Brookfield Asset Management

Toronto, ON

Valuations Analyst Intern

Jan 2026 - May 2026

- Ran scenario and sensitivity analyses to frame upside and downside cases, and presented the resulting recommendations to senior stakeholders supporting capital allocation decisions.
- Built and maintained valuation models across a \$200 billion global infrastructure portfolio, turning market data into decision-ready inputs for quarterly reviews.

Financial Planning & Analysis (FP&A) Intern

Sep 2025 - Dec 2025

- Coordinated across business units to consolidate and reconcile monthly reporting, resolving conflicting figures before packages reached leadership review.
- Modelled liquidity, revenue, and EBITDA forecasts for quarterly planning, and prepared inputs used in earnings materials reviewed by leadership and investors.

QuadReal Property Group

Toronto, ON

Data Analyst Intern

Jan 2025 - Apr 2025

- Ran discovery sessions with the investment team to understand how they made regional risk decisions, then scoped which metrics would actually move those decisions versus which ones were just noise.
- Owned the build of the resulting Power BI dashboard suite for a \$59 billion portfolio, making the tradeoff calls on what to include so the team got signal, not just more data.
- Noticed a manual step in the monthly reporting workflow was quietly costing the team hours every week, and made the case to fix it even though it wasn't part of the original scope.
- Automated the fix with VBA, saving roughly 10 hours weekly and speeding up the time between data close and investor-facing reports going out.

RSM

Toronto, ON

Audit Intern

Jan 2024 - Apr 2024

- Worked directly with client finance teams to reconcile accounts and clear outstanding items, and built reusable Excel templates that cut documentation time for the engagement team.

LEADERSHIP & INVOLVEMENT

Accounting and Finance Student Association (AFSA)

Waterloo, ON

Project Manager

Sep 2022 - Apr 2023

- Owned professional development events end to end for undergraduate students, scoping each event's format and coordinating timelines, speakers, and volunteers across 6 deliveries.

University of Waterloo

Waterloo, ON

Course Assistant

Jan 2024 - Present

- Partnered with the professor to restructure the course's content, drawing on pain points identified as a student who had previously taken it.
